# Subject index

Acinar cells
Electropulsing of acinar cells isolated from rat pancreas. Studies of reversible membrane perforation and blebbing (Kosowski, Letko) 97
Active pumping
Electrogenic active proton pump in *Hevea brasiliensis* laticiferous cells. Its role in activating sucrose/$H^+$ and glucose/$H^+$ symports at the plasma membrane (Bouteau et al.) 223
Electroconformational coupling for ion transport in an oscillating electric field: rectification versus active pumping (Markin, Tsong) 251
Adriamycin
Alteration of the passive electrical properties of adriamycin-treated red cell membrane deduced from dielectric spectroscopy (Diociaiuti et al.) 177
Analytical applications
Electrochemical reduction of azido nucleosides. Mechanism and synthetic and analytical applications (Kawczynski et al.) 441
Aqueous media
Cathodic stripping voltammetric determination of the cephalosporin antibiotic Ceftriaxone at the mercury electrode in aqueous and biological media (Abo El Maali et al.) 485
Aromatic compounds
The kinetics of simultaneous conversion of hydrogen peroxide and aromatic compounds at peroxidase electrodes (Kulys et al.) 277
Avarone
Mechanism of oxidation of 1-benzyl-1,4-dihydronicotinamide by the biologically active *p*-benzoquinone derivative, avarone, in a cationic micellar medium. An electrochemical approach (Davidović et al.) 457
Azido nucleosides
Electrochemical reduction of azido nucleosides. Mechanism and synthetic and analytical applications (Kawczynski et al.) 441
Bacteriorhodopsin
Emulsion photobioelectrochemistry: bacteriorhodopsin phototransfer of protons through the water/lipid interface (Gugeshashvili et al.) 139
Barbituric acid
Voltammetric studies on the surface activity and orientation of 2-thiobarbituric acid at the mercury/solution interface (Kamal) 359
Barley protoplast
Modification of electrofusion of barley protoplast by membrane-active agents (Zhang et al.) 87
Bilayer modified electrodes
Interfacial electrochemistry of cytochrome *c* at a lipid bilayer modified electrode: effect of incorporation of negative charges into the bilayer on cyclic voltammetric parameters (Salamon, Tollin) 321
Bilirubin
Spectroelectrochemical study of biliverdin produced by the electrooxidation of bilirubin (Cheng et al.) 345
Biliverdin
Spectroelectrochemical study of biliverdin produced by the electrooxidation of bilirubin (Cheng et al.) 345
Biological media
Cathodic stripping voltammetric determination of the cephalosporin antibiotic Ceftriaxone at the mercury electrode in aqueous and biological media (Abo El Maali et al.) 485
Blebbing
Electropulsing of acinar cells isolated from rat pancreas. Studies of reversible membrane perforation and blebbing (Kosowski, Letko) 97
*Bombyx mori*
Membrane potential of *Bombyx mori* silk

fibroin membrane induced by an immobilized enzyme reaction (Demura et al.) 167
Butyrate
Voltammetric behavior of cysteine by a carbon-paste electrode containing a cobalt(II) cyclohexylbutyrate (Sugawara et al.) 469
Butyrylcholine enzyme sensor
Butyrylcholine enzyme sensor for determining organophosphorus inhibitors (Campanella et al.) 237
Cadmium
In vivo voltammetry. Electrochemical behaviour of cadmium ions translocated into the vacuole of a *Chara* cell (Tanaka) 403
Carbon fibre microelectrodes
Electrochemical determination of superoxide anions generated from a single neutrophil (Tanaka et al.) 413
Carbon-paste electrode
Voltammetric behavior of cysteine by a carbon-paste electrode containing a cobalt(II) cyclohexylbutyrate (Sugawara et al.) 469
Cathodic stripping
Cathodic stripping voltammetric determination of the cephalosporin antibiotic Ceftriaxone at the mercury electrode in aqueous and biological media (Abo El Maali et al.) 485
Ceftriaxone
Cathodic stripping voltammetric determination of the cephalosporin antibiotic Ceftriaxone at the mercury electrode in aqueous and biological media (Abo El Maali et al.) 485
Cell attraction
The force of mutual cell attraction induced by radio frequency electric fields (Zhelev et al.) 193
Cephalosporin
Cathodic stripping voltammetric determination of the cephalosporin antibiotic Ceftriaxone at the mercury electrode in aqueous and biological media (Abo El Maali et al.) 485
*Chara*
In vivo voltammetry. Electrochemical behaviour of cadmium ions translocated into the vacuole of a *Chara* cell (Tanaka) 403
Charged membranes
Lipid immiscibility and structure of the charged membrane–water interface. A theoretical investigation of glycolipids containing bilayers (Raudino, Bianciardi) 63
*Chromatium vinosum*
Polarographic studies of *Chromatium vinosum* high-potential iron protein. Evidence for surface chemistry at the Hg-electrode (Borsari et al.) 123
Chromatophores
A photocell based on a high concentration of chromatophore (Tamura et al.) 117
Cobalt
Voltammetric behavior of cysteine by a carbon-paste electrode containing a cobalt(II) cyclohexylbutyrate (Sugawara et al.) 469
Cyclic voltammetry
Interfacial electrochemistry of cytochrome *c* at a lipid bilayer modified electrode: effect of incorporation of negative charges into the bilayer on cyclic voltammetric parameters (Salamon, Tollin) 321
Cysteine
Voltammetric behavior of cysteine by a carbon-paste electrode containing a cobalt(II) cyclohexylbutyrate (Sugawara et al.) 469
Cytochrome *c*
Interfacial electrochemistry of cytochrome *c* at a lipid bilayer modified electrode: effect of incorporation of negative charges into the bilayer on cyclic voltammetric parameters (Salamon, Tollin) 321
Depolarizing cations
Calculation of the influence of outer depolarizing cations on the dynamics of excitable biomembranes (Schulze) 159
Dielectric properties
On the relationship between the nonlinear dielectric properties and respiratory activity of the obligately aerobic bacterium *Micrococcus luteus* (Woodward, Kell) 423
Dielectric spectroscopy
Alteration of the passive electrical properties of adriamycin-treated red cell membrane deduced from dielectric spectroscopy (Diociaiuti et al.) 177
Dielectrophoresis
The electric field strength distribution in sample chambers commonly used in electrofusion of cells (Pelc) 205
DNA
Interaction of DNA with $Pb^{2+}$. Voltammetric and spectroscopic studies (Séquaris, Swiatek) 15
Dumb-bell shaped particles
Electrorotation of dumb-bell shaped particles. Theory and experiment (Egger et al.) 383
Dye modified electrode
Rapid electrochemical oxidation of hemo-

globin at a dye modified electrode (Zhu, Dong) 351
Dynamics
Calculation of the influence of outer depolarizing cations on the dynamics of excitable biomembranes (Schulze) 159
Electric field distribution
The electric field strength distribution in sample chambers commonly used in electrofusion of cells (Pelc) 205
Electric fields
The force of mutual cell attraction induced by radio frequency electric fields (Zhelev et al.) 193
Electrocatalysis
Electrocatalytic glucose sensor for subcutaneous application (Lemke, Lustermann) 43
Electroconformational coupling
Electroconformational coupling for ion transport in an oscillating electric field: rectification versus active pumping (Markin, Tsong) 251
Electrofusion
Modification of electrofusion of barley protoplast by membrane-active agents (Zhang et al.) 87
The electric field strength distribution in sample chambers commonly used in electrofusion of cells (Pelc) 205
Electron transfer
Interfacial electron transfer of flavin coenzymes and riboflavin adsorbed on textured $TiO_2$ films (Shinohara et al.) 307
Electroporation
Kinetics of pore resealing in cell membranes after electroporation (Saulis et al.) 1
The electric field strength distribution in sample chambers commonly used in electrofusion of cells (Pelc) 205
Stable transfer of plasmid pSV3 *neo* in CV-1 cells by electroporation (Doncheva et al.) 339
Electropulsation
Electropulsing of acinar cells isolated from rat pancreas. Studies of reversible membrane perforation and blebbing (Kosowski, Letko) 97
Electrorotation
Electrorotation of dumb-bell shaped particles. Theory and experiment (Egger et al.) 383
Erythrocytes
Alteration of the passive electrical properties of adriamycin-treated red cell membrane deduced from dielectric spectroscopy (Diociaiuti et al.) 177
Electrorotation of dumb-bell shaped particles. Theory and experiment (Eggar et al.) 383
Excitable biomembranes
Calculation of the influence of outer depolarizing cations on the dynamics of excitable biomembranes (Schulze) 159
Field stabilization
On the existence of an intramembrane field stabilization systems in cells (Dukhin et al.) 131
Flavin coenzymes
Interfacial electron transfer of flavin coenzymes and riboflavin adsorbed on textured $TiO_2$ films (Shinohara et al.) 307
Glassy carbon electrode
Electrochemical behaviour of the ubiquinone-$Q_{10}$ film coated onto a glassy carbon electrode by the spinner method (Takehara, Ide) 297
Glucose sensors
Electrocatalytic glucose sensor for subcutaneous application (Lemke, Lustermann) 43
Glucose sensing in the low and negative region: utilization of a thin-film electrode (Yao et al.) 211
Glucose symports
Electrogenic active proton pump in *Hevea brasiliensis* laticiferous cells. Its role in activating sucrose/$H^+$ and glucose/$H^+$ symports at the plasma membrane (Bouteau et al.) 223
Glycolipids
Lipid immiscibility and structure of the charged membrane–water interface. A theoretical investigation of glycolipids containing bilayers (Raudino, Bianciardi) 63
Gramidicin
Studies on the exchange of gramicidin in liposomes (Jyothi et al.) 395
Hamster cells
Lack of c-mitotic effects in V79 Chinese hamster cells exposed to 50 Hz magnetic fields (Saalman et al.) 335
Hemoglobin
Rapid electrochemical oxidation of hemoglobin at a dye modified electrode (Zhu, Dong) 351
*Hevea brasiliensis*
Electrogenic active proton pump in *Hevea*

*brasiliensis* laticiferous cells. Its role in activating sucrose/$H^+$ and glucose/$H^+$ symports at the plasma membrane (Bouteau et al.) 223

Hydrogen peroxide
The kinetics of simultaneous conversion of hydrogen peroxide and aromatic compounds at peroxidase electrodes (Kulys et al.) 277

Immiscibility
Lipid immiscibility and structure of the charged membrane–water interface. A theoretical investigation of glycolipids containing bilayers (Raudino, Bianciardi) 63

Immobilized enzyme
Membrane potential of *Bombyx mori* silk fibroin membrane induced by an immobilized enzyme reaction (Demura et al.) 167

Immobilized reaction centers
Photoelectrochemical effects for chemically modified platinum electrodes with immobilized reaction centers from *Rhodobacter sphaeroides* R-26 (Solov'ev et al.) 29

Ion transport
Electroconformational coupling for ion transport in an oscillating electric field: rectification versus active pumping (Markin, Tsong) 251

Iron protein
Polarographic studies of *Chromatium vinosum* high-potential iron protein. Evidence for surface chemistry at the Hg-electrode (Borsari et al.) 123

Kinetics
Kinetics of pore resealing in cell membranes after electroporation (Saulis et al.) 1
The kinetics of simultaneous conversion of hydrogen peroxide and aromatic compounds at peroxidase electrodes (Kulys et al.) 277

Laticifierous cells
Electrogenic active proton pump in *Hevea brasiliensis* laticiferous cells. Its role in activating sucrose/$H^+$ and glucose/$H^+$ symports at the plasma membrane (Bouteau et al.) 223

Lead
Interaction of DNA with $Pb^{2+}$. Voltammetric and spectroscopic studies (Séquaris, Swiatek) 15

Lipid bilayers
Merocyanin 540 fluorescent probe-induced changes in mechanical and electrical characteristics of lipid bilayers (Proks, Hianik) 493

Liposomes
Studies on the exchange of gramicidin in liposomes (Jyothi et al.) 395

Magnetic fields
Lack of c-mitotic effects in V79 Chinese hamster cells exposed to 50 Hz magnetic fields (Saalman et al.) 335

Mechanisms
Electrochemical reduction of azido nucleosides. Mechanism and synthetic and analytical applications (Kawczynski et al.) 441

Membrane-active agents
Modification of electrofusion of barley protoplast by membrane-active agents (Zhang et al.) 87

Membrane perforation
Electropulsing of acinar cells isolated from rat pancreas. Studies of reversible membrane perforation and blebbing (Kosowski, Letko) 97

Membrane potential
Membrane potential of *Bombyx mori* silk fibroin membrane induced by an immobilized enzyme reaction (Demura et al.) 167

Membranes
Alteration of the passive electrical properties of adriamycin-treated red cell membrane deduced from dielectric spectroscopy (Diociaiuti et al.) 177
Kinetics of pore resealing in cell membranes after electroporation (Saulis et al.) 1
Lipid immiscibility and structure of the charged membrane–water interface. A theoretical investigation of glycolipids containing bilayers (Raudino, Bianciardi) 63
Effects of monofunctional sulfhydryl reagents on the proton permeability of pea thylakoid membranes (Apostolova, Ivanov) 79
Electropulsing of acinar cells isolated from rat pancreas. Studies of reversible membrane perforation and blebbing (Kosowski, Letko) 97
On the existence of an intramembrane field stabilization systems in cells (Dukhin et al.) 131
Calculation of the influence of outer depolarizing cations on the dynamics of excitable biomembranes (Schulze) 159
Electrogenic active proton pump in *Hevea brasiliensis* laticiferous cells. Its role in activating sucrose/$H^+$ and glucose/$H^+$ sym-

ports at the plasma membrane (Bouteau et al.) 223
Studies on the exchange of gramicidin in liposomes (Jyothi et al.) 395
Mercury
Voltammetric studies on the surface activity and orientation of 2-thiobarbituric acid at the mercury/solution interface (Kamal) 359
In vivo voltammetry. Electrochemical behaviour of cadmium ions translocated into the vacuole of a *Chara* cell (Tanaka) 403
Cathodic stripping voltammetric determination of the cephalosporin antibiotic Ceftriaxone at the mercury electrode in aqueous and biological media (Abo El Maali et al.) 485
Merocyanin
Merocyanin 540 fluorescent probe-induced changes in mechanical and electrical characteristics of lipid bilayers (Proks, Hianik) 493
Metal surface
The interaction of microperoxidase (MP-11) with $Ag^+$ ions and metallic silver surface (Razumas et al.) 475
Micellar medium
Mechanism of oxidation of 1-benzyl-1,4-dihydronicotinamide by the biologically active *p*-benzoquinone derivative, avarone, in a cationic micellar medium. An electrochemical approach (Davidović et al.) 457
*Micrococcus luteus*
On the relationship between the nonlinear dielectric properties and respiratory activity of the obligately aerobic bacterium *Micrococcus luteus* (Woodward, Kell) 423
Microelectrodes
In vivo voltammetry. Electrochemical behaviour of cadmium ions translocated into the vacuole of a *Chara* cell (Tanaka) 403
Electrochemical determination of superoxide anions generated from a single neutrophil (Tanaka et al.) 413
Microperoxidase
The interaction of microperoxidase (MP-11) with $Ag^+$ ions and metallic silver surface (Razumas et al.) 475
Mitosis
Lack of c-mitotic effects in V79 Chinese hamster cells exposed to 50 Hz magnetic fields (Saalman et al.) 335
Modified electrodes
Photoelectrochemical effects for chemically modified platinum electrodes with immobilized reaction centers from *Rhodobacter sphaeroides* R-26 (Solov'ev et al.) 29
Bulk modified enzyme electrodes for reagentless detection of peroxides (Wollenberger et al.) 287
Electrochemical behaviour of the ubiquinone-$Q_{10}$ film coated onto a glassy carbon electrode by the spinner method (Takehara, Ide) 297
Rapid electrochemical oxidation of hemoglobin at a dye modified electrode (Zhu, Dong) 351
Negatively charged bilayers
Interfacial electrochemistry of cytochrome *c* at a lipid bilayer modified electrode: effect of incorporation of negative charges into the bilayer on cyclic voltammetric parameters (Salamon, Tollin) 321
Neuroblastoma cells
Different modes of operation of single sodium channelsin neuroblastoma cells (Iliev) 107
Neutrophils
Electrochemical determination of superoxide anions generated from a single neutrophil (Tanaka et al.) 413
Nicotinamide
Mechanism of oxidation of 1-benzyl-1,4-dihydronicotinamide by the biologically active *p*-benzoquinone derivative, avarone, in a cationic micellar medium. An electrochemical approach (Davidović et al.) 457
Obligate aerobes
On the relationship between the nonlinear dielectric properties and respiratory activity of the obligately aerobic bacterium *Micrococcus luteus* (Woodward, Kell) 423
Organophosphorus inhibitors
Butyrylcholine enzyme sensor for determining organophosphorus inhibitors (Campanella et al.) 237
Oscillating electric field
Electroconformational coupling for ion transport in an oscillating electric field: rectification versus active pumping (Markin, Tsong) 251
Peroxidase electrodes
The kinetics of simultaneous conversion of hydrogen peroxide and aromatic compounds at peroxidase electrodes (Kulys et al.) 277
Peroxides
The kinetics of simultaneous conversion of

hydrogen peroxide and aromatic compounds at peroxidase electrodes (Kulys et al.) 277
Bulk modified enzyme electrodes for reagentless detection of peroxides (Wollenberger et al.) 287
Photobioelectrochemistry
Emulsion photobioelectrochemistry: bacteriorhodopsin phototransfer of protons through the water/lipid interface (Gugeshashvili et al.) 139
Photocell
A photocell based on a high concentration of chromatophore (Tamura et al.) 117
Photoelectrochemistry
Photoelectrochemical effects for chemically modified platinum electrodes with immobilized reaction centers from *Rhodobacter sphaeroides* R-26 (Solov'ev et al.) 29
Plasmid transfer
Stable transfer of plasmid pSV3 *neo* in CV-1 cells by electroporation (Doncheva et al.) 339
Platinum
Photoelectrochemical effects for chemically modified platinum electrodes with immobilized reaction centers from *Rhodobacter sphaeroides* R-26 (Solov'ev et al.) 29
In vivo voltammetry. Electrochemical behaviour of cadmium ions translocated into the vacuole of a *Chara* cell (Tanaka) 403
Polarography
Polarographic studies of *Chromatium vinosum* high-potential iron protein. Evidence for surface chemistry at the Hg-electrode (Borsari et al.) 123
Pollen
Electrorotation of dumb-bell shaped particles. Theory and experiment (Egger et al.) 383
Pores
Kinetics of pore resealing in cell membranes after electroporation (Saulis et al.) 1
Proton permeability
Effects of monofunctional sulfhydryl reagents on the proton permeability of pea thylakoid membranes (Apostolova, Ivanov) 79
Proton transfer
Emulsion photobioelectrochemistry: bacteriorhodopsin phototransfer of protons through the water/lipid interface (Gugeshashvili et al.) 139
Protoplasts
Modification of electrofusion of barley protoplast by membrane-active agents (Zhang et al.) 87
Quinone
Mechanism of oxidation of 1-benzyl-1,4-dihydronicotinamide by the biologically active *p*-benzoquinone derivative, avarone, in a cationic micellar medium. An electrochemical approach (Davidović et al.) 457
Radio frequency electric fields
The force of mutual cell attraction induced by radio frequency electric fields (Zhelev et al.) 193
Rat pancreas
Electropulsing of acinar cells isolated from rat pancreas. Studies of reversible membrane perforation and blebbing (Kosowski, Letko) 97
Reagentless detection
Bulk modified enzyme electrodes for reagentless detection of peroxides (Wollenberger et al.) 287
Resealing
Kinetics of pore resealing in cell membranes after electroporation (Saulis et al.) 1
Respiratory activity
On the relationship between the nonlinear dielectric properties and respiratory activity of the obligately aerobic bacterium *Micrococcus luteus* (Woodward, Kell) 423
*Rhodobacter sphaeroides*
Photoelectrochemical effects for chemically modified platinum electrodes with immobilized reaction centers from *Rhodobacter sphaeroides* R-26 (Solov'ev et al.) 29
*Rhodopseudomonas viridis*
A photocell based on a high concentration of chromatophore (Tamura et al.) 117
Riboflavin
Interfacial electron transfer of flavin coenzymes and riboflavin adsorbed on textured $TiO_2$ films (Shinohara et al.) 307
Sample chambers
The electric field strength distribution in sample chambers commonly used in electrofusion of cells (Pelc) 205
Silk fibroin
Membrane potential of *Bombyx mori* silk fibroin membrane induced by an immobilized enzyme reaction (Demura et al.) 167
Silver
The interaction of microperoxidase (MP-11) with $Ag^+$ ions and metallic silver surface (Razumas et al.) 475

Single channels
Different modes of operation of single sodium channelsin neuroblastoma cells (Iliev) 107
Sodium channels
Different modes of operation of single sodium channelsin neuroblastoma cells (Iliev) 107
Spectroelectrochemistry
Spectroelectrochemical study of biliverdin produced by the electrooxidation of bilirubin (Cheng et al.) 345
Spectroscopy
Interaction of DNA with $Pb^{2+}$. Voltammetric and spectroscopic studies (Séquaris, Swiatek) 15
Spinner method
Electrochemical behaviour of the ubiquinone-$Q_{10}$ film coated onto a glassy carbon electrode by the spinner method (Takehara, Ide) 297
Subcutaneous application
Electrocatalytic glucose sensor for subcutaneous application (Lemke, Lustermann) 43
Sucrose symports
Electrogenic active proton pump in *Hevea brasiliensis* laticiferous cells. Its role in activating sucrose/$H^+$ and glucose/$H^+$ symports at the plasma membrane (Bouteau et al.) 223
Sulphydryl reagents
Effects of monofunctional sulfhydryl reagents on the proton permeability of pea thylakoid membranes (Apostolova, Ivanov) 79
Superoxide anions
Electrochemical determination of superoxide anions generated from a single neutrophil (Tanaka et al.) 413
Surface activity
Voltammetric studies on the surface activity and orientation of 2-thiobarbituric acid at the mercury/solution interface (Kamal) 359
Surface chemistry
Polarographic studies of *Chromatium vinosum* high-potential iron protein. Evidence for surface chemistry at the Hg-electrode (Borsari et al.) 123
Symports
Electrogenic active proton pump in *Hevea brasiliensis* laticiferous cells. Its role in activating sucrose/$H^+$ and glucose/$H^+$ symports at the plasma membrane (Bouteau et al.) 223
Synthetic applications
Electrochemical reduction of azido nucleosides. Mechanism and synthetic and analytical applications (Kawczynski et al.) 441
Thin-film electrodes
Glucose sensing in the low and negative region: utilization of a thin-film electrode (Yao et al.) 211
Thiobarbituric acid
Voltammetric studies on the surface activity and orientation of 2-thiobarbituric acid at the mercury/solution interface (Kamal) 359
Thylakoid membranes
Effects of monofunctional sulfhydryl reagents on the proton permeability of pea thylakoid membranes (Apostolova, Ivanov) 79
Titanium dioxide films
Interfacial electron transfer of flavin coenzymes and riboflavin adsorbed on textured $TiO_2$ films (Shinohara et al.) 307
Translocation
In vivo voltammetry. Electrochemical behaviour of cadmium ions translocated into the vacuole of a *Chara* cell (Tanaka) 403
Ubiquinone
Electrochemical behaviour of the ubiquinone-$Q_{10}$ film coated onto a glassy carbon electrode by the spinner method (Takehara, Ide) 297
Vacuoles
In vivo voltammetry. Electrochemical behaviour of cadmium ions translocated into the vacuole of a *Chara* cell (Tanaka) 403
Voltammetry
Interaction of DNA with $Pb^{2+}$. Voltammetric and spectroscopic studies (Séquaris, Swiatek) 15
Voltammetric studies on the surface activity and orientation of 2-thiobarbituric acid at the mercury/solution interface (Kamal) 359
In vivo voltammetry. Electrochemical behaviour of cadmium ions translocated into the vacuole of a *Chara* cell (Tanaka) 403
Cathodic stripping voltammetric determination of the cephalosporin antibiotic Ceftriaxone at the mercury electrode in aqueous and biological media (Abo El Maali et al.) 485
Water/lipid interface
Emulsion photobioelectrochemistry: bacteriorhodopsin phototransfer of protons through the water/lipid interface (Gugeshashvili et al.) 139
